

# UNDERSTANDING HIGH- PERFORMANCE BUILDING

## LECTURE SERIES

Attend this four-part lecture series to:

- ◆ Understand the language of high-performance construction
- ◆ Learn about the science behind moisture and airflow
- ◆ Discover how high-performance construction influences material selection, installation, quality control, and operations
- ◆ Implement best practices to achieve higher efficiency, performance, and healthy indoor environmental quality

💰 All Sessions are free!

🕒 11:30-1:00 pm, a light lunch included

📍 The Community Services Building  
100 West 10th Street, Wilmington, DE 19801

Validated parking available at the CSB Garage, 111 W  
11th St., Wilmington, DE 19801 (entrance on Orange St.)

**REGISTER TODAY**  
[www.aiadelaware.org](http://www.aiadelaware.org)

## 4 TOPICS

- **1/17/24: Designing and Building to High Performance: The Science Behind it and Ways to Talk About Why It's Important** (1.5 AIA LU/HSW CE credit)
- **1/31/24: The Science Behind Residential Building Enclosure and Airtightness: Hands-on Materials Familiarization** (1.5 AIA LU/HSW CE credit)
- **2/14/24: Mechanical Ventilation - A Hands-on Introduction to the Mechanics and Design Specifications for Its Use\***
- **2/28/24: Heat Pump Technology - A Hands-on Introduction to the Mechanics and Design Specifications for Its Use\***

*\*Session has been submitted to  
AIA CES for approval.*
